DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. All rejections from the previous Office Action are incorporated herein. Responses to amendments are presented below:

3. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Allum (US Pat. 6,063,046). Allum describes the same invention as claimed, as described in the previous Action. Allum shows the device as having a motor (58) with a revolving shaft attached to the plate and driving the plate so as to provide the plate with a tilting motion around an axis of rotation of the revolving shaft (axis 54, described in col. 11, lines 40-46). Allum shows a rotation angle sensor for measuring a rotation angle as the plate is tilted around the axis of rotation of the revolving shaft (col. 11, lines 59-62, "in the pitch and roll directions"). Allum shows a torque measuring mechanism for measuring torque applied to the plate based on the motion of the user (Col. 12, lines 61-65). Allum further shows a kinetic model analyzer (col. 10, lines 6-10) into which an output from each of the rotation angle sensor (col. 12, lines 10-15) and the torque measuring mechanism (Col. 12, lines 19-22) is inputted. The processor (24) described by Allum determines a target rotation angle (col. 12, lines 19-22). The Allum device further shows a motor controller (24, col. 10, lines 2-4) for controlling the motor so that the plate is tilted at the target rotation angle determined by the kinetic model analyzer.

4. Regarding claims 11-25, the rejection from the previous Action is maintained.

Response to Arguments

5. Applicant's arguments filed 06/26/2007 have been fully considered but they are not persuasive. Clarifications of the components described by Allum but recited in amended claim 10 are presented above.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for cited art of interest.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
